# Analytical Results from CD4CDM's CDM Pipeline and Database

Jørgen Fenhann, UNEP Risoe Centre

## What is the UNEP Risoe CDM/JI Pipeline?

- The UNEP Risoe Pipeline is a spreadsheet containing the most important information from all the Project Design Documents, and the New/Approved Methodologies available on the UNFCCC CDM web site: [cdm.unfccc.int](http://cdm.unfccc.int)
- The UNEP Risoe Pipeline is updated Monthly at: [www.cd4cdm.org/Publications/CDMPipeline.xls](http://www.cd4cdm.org/Publications/CDMPipeline.xls)
- The Pipeline contains a large amount of analysis like: time-series, status of project in the project cycle, types, DOEs, Methodology overview, issuance success etc.
- The Pipeline is used worldwide for other analysis.

# How are CDM projects progressing in the project cycle?

Status of CDM projects (9 November 2006)	Number
<b>At validation</b>	<b>845</b>
Request for registration	52
Request for review	18
Correction requested	6
Under review	4
<b>Total in the registration process</b>	<b>80</b>
Withdrawn	2
Rejected by EB	8
Registered, no issuance requested	313
Registered, request for CERs	4
Registered, correction requested	3
Registered, request for CER issuance review	1
Registered, under review	3
Registered. CER issued	78
<b>Total registered</b>	<b>402</b>
<b>Total number of projects:</b>	<b>1337</b>

# The number of CDM projects in the pipeline is developing very fast

Number of CDM projects starting the public comments period each month, the number of them that have requested registration, and the cumulative timelag between these two events.

# How many projects of different types does the pipeline contain?

**Number (%) of CDM projects in each sector**

# How much is the existing CDM projects expected to reduce GHG emissions until 2012?

# How many CERs are the different types of CDM projects expected to produce?

**CERs until 2012 from CDM projects in each sector**

# How many of the CDM project succeed passing the project cycle?

Number of CDM projects starting the public comments period each quarter, the number of them that have requested registration, and the fraction in % as a curve

The figure shows that maybe 80-90% of the projects will request registration.

Almost all projects requesting registration gets registered: Only 8 projects have been rejected by the EB.

# What is the issuance success (the CERs issued/CERs expected in the last PDD)?
